VEHICLE HEIGHT ADDED (mm/in)

Exercise extreme care when transporting wind-resistant loads. Special consideration must be taken when cornering and braking.

Off-road conditions can be much more rigorous. Extreme care must be taken on any driven path that does not contain a surface protection layer (tar/bitumen).

Racks must be removed when vehicle is put through an automatic car wash.

Ensure Ladder is well supported on the ground to support tent. Take extreme caution when climbing heights above 1.2m/4ft.

Do NOT obstruct windscreen camera sensors

Warranty for roof rack system will be void if the front of the kayak is not secured to the bonnet

Distribute loads evenly and laterally/longitudinally as low as possible over the span.

Avoid point loads concentrated at the front or rear.

Long flexible loads must attach securely to rigid support and be tied down to the bonnet

Surfboard Overhang > 600mm must be tied to the bonnet

Loads must be tied down to Platform, **NOT** around Backbone

Use only non-stretch fastening ropes or straps to attach cargo to roof racks

Ensure sunroof will not collide with roof rack system.

In service maintenance checks

- All bolts should be checked after driving a short distance when you first install your roof racks to ensure none have loosened.
- All bolted connections should be checked again at regular intervals (weekly is recommended, depending on road conditions, usage, loads and distances travelled).
- All bolted connections should be checked each time they are re-fitted.
- Off-road conditions are more rigorous. Check all bolted connections and your load more regularly.
- Ensure that your total vehicle manufacturer's GVM (gross vehicle mass) and gross axle weights are not exceeded (refer to vehicle owner's manual).

Note for Dealers and Fitters

It is your responsibility to ensure these fitting instructions are given to the end user or client. These instructions remain the property of Rhino-Rack Australia Pty. Ltd. and may not be changed or used for any other purpose than intended.

Torque Settings

Throughout this instruction manual, an impact driver can be used to speed up installation. However, it is important to ensure that the final turns are completed with a torque wrench to achieve the required torque rating.

Take caution when using an impact driver, as excessive torque can result in stripped threads.

Torque Settings:

Unless stated otherwise in these instructions, all fasteners should be set to the following torque settings:

4-5Nm
3-4lbs/ft

8-10Nm
6-7.5lbs/ft

16-18Nm
12-13lbs/ft
